Product Engineering: Molecular Structure and Properties (Topics in Chemical Engineering) James Wei

The current chemical engineering curriculum concentrates on process: the efficient manufacturing in quantity of traditional chemical products such as ammonia and benzene. However, many chemical companies now invent and manufacture specialty products with particular properties such as pharmaceuticals, cosmetics, and electronic coatings, and their employees need to know how to design the products as well as manufacture them. James Wei, a famous chemical engineer, is writing this book to provide theories and case studies in product engineering the design of new, useful products with desired properties. The first section relates historical case studies of successful product invention and development by individuals and companies. The second part of the book describes the toolbox of molecular structure-property relations. A desired product needs to have certain properties (for example, phase transition or thermal properties) and the chemist must find or design a molecular structure with the required properties. This section will instruct chemists in the analysis of structure and property information. The third section is concerned with the next stage: product research and design. It will discuss improving the desired product by additives and blending, among other strategies. It will also cover future challenges in product engineering.

From reader reviews:

Willie Hickox:

The actual book Product Engineering: Molecular Structure and Properties (Topics in Chemical Engineering) will bring someone to the new experience of reading a new book. The author style to spell out the idea is very unique. Should you try to find new book to read, this book very suitable to you. The book Product Engineering: Molecular Structure and Properties (Topics in Chemical Engineering) is much recommended to you to see. You can also get the e-book through the official web site, so you can quicker to read the book.

Michael Kimbrell:

Playing with family in the park, coming to see the sea world or hanging out with buddies is thing that usually you may have done when you have spare time, then why you don't try point that really opposite from that. One activity that make you not feeling tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of knowledge. Even you love Product Engineering: Molecular Structure and Properties (Topics in Chemical Engineering), you could enjoy both. It is great combination right, you still wish to miss it? What kind of hang type is it? Oh come on its mind hangout men. What? Still don't buy it, oh come on its known as reading friends.

John Kirk:

Many people spending their time by playing outside along with friends, fun activity having family or just watching TV the whole day. You can have new activity to pay your whole day by reading through a book. Ugh, do you think reading a book can actually hard because you have to accept the book everywhere? It okay you can have the e-book, having everywhere you want in your Touch screen phone. Like Product Engineering: Molecular Structure and Properties (Topics in Chemical Engineering) which is finding the e-book version. So , why not try out this book? Let's see.

Elizabeth Schwartz:

Don't be worry for anyone who is afraid that this book may filled the space in your house, you can have it in e-book technique, more simple and reachable. That Product Engineering: Molecular Structure and Properties (Topics in Chemical Engineering) can give you a lot of pals because by you looking at this one book you have factor that they don't and make a person more like an interesting person. This specific book can be one of a step for you to get success. This guide offer you information that maybe your friend doesn't recognize, by knowing more than various other make you to be great people. So , why hesitate? Let me have Product Engineering: Molecular Structure and Properties (Topics in Chemical Engineering).
