## **The History of Rome (Annotated)** Theodor Mommsen

This is the complete five book, five volume work.

Theodor Mommsen won the 1902 Nobel Prize in Literature for *Romische Geschichte* (Roman History). Anyone interested in Roman history is unlikely to need convincing that this work is still one of the best sources for a history of pre-imperial Rome.

This translation is in the public domain, but most of the electronic versions available are terrible reading experiences. A great deal of work has been done to this version to make an electronic book that compares favorably to the original print versions. Hundreds of errors that exist in most free versions have been corrected. Italic script has been reintroduced as well as Unicode Greek lettering for Greek text. Proper navigation is available for chapters, the table of contents, footnotes, etc. Notes have been added for old Italic characters that do not render on most e-readers. In short, the ASCII text has been converted into a proper e-book, and has been given the thorough proofreading that many other versions lack.
