Computer Models of Speech Using Fuzzy Algorithms (Advanced Applications in Pattern Recognition)

Renato de Mori

It is with great pleasure that I present this third volume of the series "Advanced Applications in Pattern Recognition." It represents the summary of many man- (and woman-) years of effort in the field of speech recognition by the author's former team at the University of Turin. It combines the best results in fuzzy-set theory and artificial intelligence to point the way to definitive solutions to the speech-recognition problem. It is my hope that it will become a classic work in this field. I take this opportunity to extend my thanks and appreciation to Sy Marchand, Plenum's Senior Editor responsible for overseeing this series, and to Susan Lee and Jo Winton, who had the monumental task of preparing the camera-ready master sheets for publication. Morton Nadler General Editor vii PREFACE Si parva licet componere magnis Virgil, Georgics, 4,176 (37-30 B.C.) The work reported in this book results from years of research oriented toward the goal of making an experimental model capable of understanding spoken sentences of a natural language. This is, of course, a modest attempt compared to the complexity of the functions performed by the human brain. A method is introduced for conceiving modules performing perceptual tasks and for combining them in a speech understanding system.

From reader reviews:

Lewis Dall:

Information is provisions for folks to get better life, information today can get by anyone with everywhere. The information can be a expertise or any news even a concern. What people must be consider while those information which is inside former life are difficult to be find than now's taking seriously which one works to believe or which one the particular resource are convinced. If you find the unstable resource then you buy it as your main information there will be huge disadvantage for you. All of those possibilities will not happen with you if you take Computer Models of Speech Using Fuzzy Algorithms (Advanced Applications in Pattern Recognition) as your daily resource information.

Tyron Lenahan:

This book untitled Computer Models of Speech Using Fuzzy Algorithms (Advanced Applications in Pattern Recognition) to be one of several books which best seller in this year, here is because when you read this reserve you can get a lot of benefit upon it. You will easily to buy this kind of book in the book shop or you can order it by using online. The publisher with this book sells the e-book too. It makes you easier to read this book, as you can read this book in your Touch screen phone. So there is no reason to your account to past this publication from your list.

Lillian Thrasher:

You could spend your free time to read this book this e-book. This Computer Models of Speech Using Fuzzy Algorithms (Advanced Applications in Pattern Recognition) is simple to bring you can read it in the playground, in the beach, train and soon. If you did not possess much space to bring the printed book, you can buy typically the e-book. It is make you better to read it. You can save the actual book in your smart phone. Therefore there are a lot of benefits that you will get when one buys this book.

Jeffrey Price:

Beside this kind of Computer Models of Speech Using Fuzzy Algorithms (Advanced Applications in Pattern Recognition) in your phone, it could possibly give you a way to get more close to the new knowledge or details. The information and the knowledge you will got here is fresh through the oven so don't possibly be worry if you feel like an previous people live in narrow community. It is good thing to have Computer Models of Speech Using Fuzzy Algorithms (Advanced Applications in Pattern Recognition) because this book offers to your account readable information. Do you often have book but you seldom get what it's about. Oh come on, that will not happen if you have this in your hand. The Enjoyable option here cannot be questionable, just like treasuring beautiful island. Use you still want to miss that? Find this book and also read it from at this point!
