What does it mean for human beings to exist in an era of dronified state violence? How can we understand the rise of robotic systems of power and domination? Focusing on U.S. drone warfare and its broader implications as has no other book to date, *Predator Empire* argues that we are witnessing a transition from a labor-intensive “American empire,” to a machine-intensive “Predator Empire.”

Moving from the Vietnam War to the War on Terror and beyond, Ian G. R. Shaw reveals how changes in military strategy, domestic policing, and state surveillance have come together to enclose our planet in a robotic system of control. The rise of drones presents a series of “existential crises,” he suggests, that are reengineering not only spaces of violence but also the very character of the modern state. Positioning drone warfare as a part of a much longer project to watch and enclose the human species, he shows that for decades—centuries even—human existence has slowly but surely been brought within the artificial worlds of “technological civilization.” Instead of incarcerating us in prisons or colonizing territory directly, the Predator Empire locks us inside a worldwide system of electromagnetic enclosure—in which democratic ideals give way to a system of totalitarian control, a machinic “rule by Nobody.”

As accessibly written as it is theoretically ambitious, *Predator Empire* provides up-to-date information about U.S. drone warfare, as well as an in-depth history of the rise of drones.
