Microcontroller Projects in C for the 8051 Dogan Ibrahim

This book is a thoroughly practical way to explore the 8051 and discover C programming through project work. Through graded projects, Dogan Ibrahim introduces the reader to the fundamentals of microelectronics, the 8051 family, programming in C, and the use of a C compiler. The specific device used for examples is the AT89C2051 - a small, economical chip with re-writable memory, readily available from the major component suppliers.

A working knowledge of microcontrollers, and how to program them, is essential for all students of electronics. In this rapidly expanding field many students and professionals at all levels need to get up to speed with practical microcontroller applications. Their rapid fall in price has made microcontrollers the most exciting and accessible new development in electronics for years - rendering them equally popular with engineers, electronics hobbyists and teachers looking for a fresh range of projects.

Microcontroller Projects in C for the 8051 is an ideal resource for self-study as well as providing an interesting, enjoyable and easily mastered alternative to more theoretical textbooks.

Dogan Ibrahim has been Associate Professor and Head of Department at the Near East University, Cyprus, lecturer at South Bank University, London, Principal Research Engineer at GEC Hirst Research Centre, and is now a hardware and software systems consultant to London's Traffic Control Systems Unit.

Practical projects that enable students and practitioners to get up and running straight away with 8051 microcontrollers

A hands-on introduction to practical C programming

A wealth of project ideas for students and enthusiasts

From reader reviews:

Frank Ouellette:

A lot of people always spent their own free time to vacation as well as go to the outside with them family members or their friend. Do you realize? Many a lot of people spent many people free time just watching TV, or playing video games all day long. If you wish to try to find a new activity that's look different you can read the book. It is really fun for yourself. If you enjoy the book you read you can spent all day long to reading a e-book. The book Microcontroller Projects in C for the 8051 it is extremely good to read. There are a lot of those who recommended this book. We were holding enjoying reading this book. In case you did not have enough space to bring this book you can buy often the e-book. You can m0ore very easily to read this book from the smart phone. The price is not very costly but this book possesses high quality.

Angela Babb:

Your reading 6th sense will not betray anyone, why because this Microcontroller Projects in C for the 8051 publication written by well-known writer whose to say well how to make book which might be understand by anyone who else read the book. Written within good manner for you, dripping every ideas and producing skill only for eliminate your hunger then you still doubt Microcontroller Projects in C for the 8051 as good book not simply by the cover but also from the content. This is one e-book that can break don't assess book by its handle, so do you still needing a different sixth sense to pick this kind of!? Oh come on your looking at sixth sense already said so why you have to listening to an additional sixth sense.

Jeffery Chavis:

Many people spending their time by playing outside with friends, fun activity using family or just watching TV all day every day. You can have new activity to shell out your whole day by reading a book. Ugh, think reading a book really can hard because you have to use the book everywhere? It alright you can have the e-book, delivering everywhere you want in your Mobile phone. Like Microcontroller Projects in C for the 8051 which is getting the e-book version. So , try out this book? Let's notice.

Manuel Porter:

Many people said that they feel bored when they reading a publication. They are directly felt that when they get a half regions of the book. You can choose the particular book Microcontroller Projects in C for the 8051 to make your own personal reading is interesting. Your own personal skill of reading talent is developing when you including reading. Try to choose very simple book to make you enjoy to read it and mingle the impression about book and studying especially. It is to be initially opinion for you to like to available a book and go through it. Beside that the e-book Microcontroller Projects in C for the 8051 can to be your new friend when you're feel alone and confuse using what must you're doing of these time.
