Causation in Negligence (Hart Studies in Private Law) Sarah Green

The principal objective of this book is simple: to provide a timely and effective means of navigating the current maze of case law on causation, in order that the solutions to causal problems might more easily be reached, and the law relating to them more easily understood. The need for this has been increasingly evident in recent judgments dealing with causal issues: in particular, it seems to be ever harder to distinguish between the different 'categories' of causation and, consequently, to identify the legal test to be applied on any given set of facts. Causation in Negligence will make such identification easier, both by clarifying the parameters of each category and mapping the current key cases accordingly, and by providing one basic means of analysis which will make the resolution of even the thorniest of causal issues a straightforward process. The causal inquiry in negligence seems to have become a highly complicated and confused area of the law. As the book demonstrates in a clearly written and comprehensive way, this is unnecessary and easily remedied. [Subject: Contract Law, Tort Law, Commercial Law, Restitution]
