Geometrical Methods of Mathematical Physics

Bernard F. Schutz

Geometrical Methods of Mathematical Physics Bernard F. Schutz

In recent years the methods of modern differential geometry have become of considerable importance in theoretical physics and have found application in relativity and cosmology, high-energy physics and field theory, thermodynamics, fluid dynamics and mechanics. This textbook provides an introduction to these methods - in particular Lie derivatives, Lie groups and differential forms - and covers their extensive applications to theoretical physics. The reader is assumed to have some familiarity with advanced calculus, linear algebra and a little elementary operator theory. The advanced physics undergraduate should therefore find the presentation quite accessible. This account will prove valuable for those with backgrounds in physics and applied mathematics who desire an introduction to the subject. Having studied the book, the reader will be able to comprehend research papers that use this mathematics and follow more advanced pure-mathematical expositions.

From reader reviews:

Charles Smith:

This Geometrical Methods of Mathematical Physics tend to be reliable for you who want to be described as a successful person, why. The main reason of this Geometrical Methods of Mathematical Physics can be one of many great books you must have is usually giving you more than just simple looking at food but feed you actually with information that probably will shock your prior knowledge. This book is handy, you can bring it everywhere and whenever your conditions throughout the e-book and printed versions. Beside that this Geometrical Methods of Mathematical Physics giving you an enormous of experience such as rich vocabulary, giving you test of critical thinking that we understand it useful in your day pastime. So , let's have it appreciate reading.

Amelia Page:

The actual book Geometrical Methods of Mathematical Physics has a lot of information on it. So when you read this book you can get a lot of profit. The book was written by the very famous author. Tom makes some research previous to write this book. This specific book very easy to read you can obtain the point easily after reading this article book.

Faye Bolin:

Why? Because this Geometrical Methods of Mathematical Physics is an unordinary book that the inside of the book waiting for you to snap that but latter it will distress you with the secret this inside. Reading this book close to it was fantastic author who all write the book in such awesome way makes the content inside easier to understand, entertaining way but still convey the meaning thoroughly. So , it is good for you for not hesitating having this nowadays or you going to regret it. This excellent book will give you a lot of rewards than the other book get such as help improving your ability and your critical thinking way. So , still want to postpone having that book? If I ended up you I will go to the book store hurriedly.

Luis Gonzalez:

Can you one of the book lovers? If yes, do you ever feeling doubt if you find yourself in the book store? Make an effort to pick one book that you just dont know the inside because don't judge book by its cover may doesn't work here is difficult job because you are afraid that the inside maybe not as fantastic as in the outside seem likes. Maybe you answer can be Geometrical Methods of Mathematical Physics why because the great cover that make you consider in regards to the content will not disappoint a person. The inside or content is actually fantastic as the outside or cover. Your reading sixth sense will directly assist you to pick up this book.
