The increasing advances in electronics allows smaller and more powerful devices, bringing wearable computing closer to reality. However, most wearable computers are very distinguished and placed on clothes and accessories. This book tries to tackle this phenomenon by introducing a new wearable computing subfield called beauty technology.

By using the body's surface as an interactive platform, the integration of technology into beauty products is explored and can be applied directly to ones skin, fingernails, and hair adding new functionality to beauty products using technology in a personal, seamless and fashionable way. An interdisciplinary approach is taken, exploring the design of Beauty Technologies such as Conductive Makeup, Tech Nails, Hairware and FX e-makeup in order to create novel interfaces for Human Computer Interaction.

From reader reviews:

Rudy Nixon:

The publication untitled Beauty Technology: Designing Seamless Interfaces for Wearable Computing (Human-Computer Interaction Series) is the reserve that recommended to you to study. You can see the quality of the reserve content that will be shown to you actually. The language that writer use to explained their ideas are easily to understand. The writer was did a lot of study when write the book, so the information that they share for you is absolutely accurate. You also could possibly get the e-book of Beauty Technology: Designing Seamless Interfaces for Wearable Computing (Human-Computer Interaction Series) from the publisher to make you a lot more enjoy free time.

Claude Gonzalez:

Beauty Technology: Designing Seamless Interfaces for Wearable Computing (Human-Computer Interaction Series) can be one of your basic books that are good idea. Most of us recommend that straight away because this guide has good vocabulary that could increase your knowledge in terminology, easy to understand, bit entertaining but nonetheless delivering the information. The copy writer giving his/her effort to put every word into joy arrangement in writing Beauty Technology: Designing Seamless Interfaces for Wearable Computing (Human-Computer Interaction Series) yet doesn't forget the main stage, giving the reader the hottest in addition to based confirm resource details that maybe you can be one among it. This great information may drawn you into brand-new stage of crucial contemplating.

Patricia Stokes:

As a scholar exactly feel bored to be able to reading. If their teacher asked them to go to the library or make summary for some e-book, they are complained. Just small students that has reading's internal or real their pastime. They just do what the trainer want, like asked to the library. They go to presently there but nothing reading really. Any students feel that studying is not important, boring and can't see colorful photographs on there. Yeah, it is for being complicated. Book is very important for you personally. As we know that on this time, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore , this Beauty Technology: Designing Seamless Interfaces for Wearable Computing (Human-Computer Interaction Series) can make you truly feel more interested to read.

Scott Tucker:

Many people said that they feel fed up when they reading a guide. They are directly felt the item when they get a half portions of the book. You can choose the particular book Beauty Technology: Designing Seamless Interfaces for Wearable Computing (Human-Computer Interaction Series) to make your own reading is interesting. Your skill of reading ability is developing when you just like reading. Try to choose basic book to make you enjoy to learn it and mingle the impression about book and studying especially. It is to be first opinion for you to like to available a book and read it. Beside that the publication Beauty Technology:

Designing Seamless Interfaces for Wearable Computing (Human-Computer Interaction Series) can to be your friend when you're feel alone and confuse using what must you're doing of these time.
